

How to turn on "Dark Mode"

Monongapedia has a setting that allows you to choose either a light or dark background. The default setting is Light Mode but you may wish to change that to Dark Mode.

Turning on "Dark Mode"

- Click on the Monongapedia logo (it looks like a stack of books with an "M" on it in the upper left-hand side.) This will take you to the home page.
- Then click on the crescent moon found on the upper right-hand side.
